6th Road, Rawalpindi - +92 340 9086301

ezaz.vercel.app - github.com/mahzaz1

malikahzaz301@gmail.com

WEB DEVELOPER

Skilled in building responsive React and Next.js applications using HTML, CSS, and JavaScript. Familiar with SSR, SSG, and dynamic routing in Next.js, along with API routes and performance optimization. Familiar with the MERN stack, with hands-on practice creating full-stack projects like a blog app and a chat app. Experienced with CI/CD workflows and applying Agile methodology to deliver iterative, collaborative, and high-quality software. I have also created a chatbot with personalized data, which you can try at ezazbot.vercel.app.

EDUCATION:

2019 - 2023 | Universty Of Haripur

Bachelor of Computer Science - 3.47 / 4.00

TECHNOLOGIES

Frontend Languages: HTML, CSS, JavaScript, jQuery, TypeScript, React.js, Next.js, Bootstrap, Tailwind CSS

State Management: Redux, Redux Toolkit, Context API, Zustand

Backend & Database: Node.js, Express.js, MongoDB, PostgreSQL, Firebase, RESTful APIs

Tools & Software: VS Code, Android Studio, Figma, pgAdmin, Postman

Libraries & Utilities: Material UI, Chart.js, Axios, Framer Motion, React Hook Form, React Query

PROFESSIONAL STRENGTHS

Soft Skills: Effective communication, client interaction, team collaboration, adaptability, quick learning, problem-solving, time management, active listening, and interpersonal skills.

EXPERIENCE

Full Stack Developer

G-13, Islamabad, PK

Red Star Technologies

18 Nov 24 - Present

At Red Star Technologies, worked on full-stack projects using Firebase and the MERN stack. Integrated APIs, implemented real-time database and authentication with Firebase, built dynamic Next.js apps, and designed responsive interfaces with Tailwind CSS to deliver modern, optimized user experiences.

React JS Developer

Shamsabad, Rawalpindi, PK

LALA Group Of Companies

21 Aug 23 - 15 Nov 24

At LALA Group of Companies, I integrated APIs for dynamic data retrieval, optimized performance by reducing load times, implemented Redux for effective state management, and developed scalable, maintainable React applications, ensuring a seamless, efficient, and user-friendly experience while following Agile methodology.

React JS Developer (Remote)

Rawalpindi, PK

Orixes Tech

01 May 23 - 30 Dec 24

At Orixes Tech, where I work remotely, I developed fast, responsive websites with a focus on accessibility and user experience. I collaborated with backend teams to seamlessly integrate APIs for real-time data updates. I also utilized Redux for state management, enhancing performance and ensuring code maintainability across all projects.

Frontend Developer

Haripur, KPK

CodeCue Solutions

01 Jan 23 - 20 Aug 23

At CodeCue Solutions, I collaborated closely with senior developers to improve user interactions, integrate APIs, and develop responsive layouts, building a solid foundation in modern web application development.

PROJECTS

- tripplannerpk.com

A global online booking platform built with React.js (frontend) and PHP (backend), enabling users to book tours, visas, and transport worldwide. Features efficient API integration for smooth frontend-backend communication.

- hajjharamain.com

An online Hajj booking platform built with Next.js, utilizing file-based routing and API integration. Implemented state management to share and persist user data across all pages, ensuring a seamless booking experience.

- wilmart.pk

Created an eCommerce website using React.js for the frontend and PHP for backend API development. Implemented Redux for efficient cart handling, with easy browsing, secure transactions, and intuitive navigation.

- wilsonspatientcommunity.com

Wilson's Patient Community is an online platform that connects patients with a global network of medical professionals across all specialties. Doctors collaborate to provide expert opinions, second opinions, and health insights, creating a trusted space for medical advice and community support.

- 3ns.domains

Built a personalized .web3 domain sale and purchase platform using Next.js and Firebase as the backend. Integrated blockchain technology and multiple AI models, with custom model features and a secure, user-friendly design.
